

ENVIRONMENT POLICY

Silver City Drilling can be contextualised as a complete drilling and completion service for the Energy, Mineral and Water Industries. We maintain a system that is certified to and compliant with ISO 14001.

Our current and on-going environmental objective is to prevent pollution and adverse impact on the environment as a result of our business activities with a target of no reportable environmental incidents. The aspects that we address in our stewardship include land management, water, flora, fauna, waste, noise, rehabilitation, indigenous and heritage protection.

Management is accountable for the Environmental performance of Silver City Drilling and the implementation of this Policy.

To consistently achieve our commitment, we will:

- Ensure our integrated management system remains relevant to our critical business activities;
- Support and encourage new ways to minimise our pollution and environmental impacts;
- Maintain our partnerships with stakeholders to achieve our objectives and obligations;
- Effectively manage resources, reduce waste and eliminate or minimise adverse environmental effects and risks that may be associated with our operations;
- Meet or exceed applicable environmental laws, statutory obligations and relevant codes of practice;
- Set measurable objectives and targets and monitor these to ensure continual improvement of our environmental performance; and
- Review and maintain our Environmental Policy and Procedures
